

GREEN TEAM

South Bank Corporation

Roles and Responsibilities

March 2024

Being sustainable is one of the Corporation's primary values. Sustainability is also identified as a key strategy in the Strategic Plan 2021-2025 to enhance the environmental performance of the precinct.

Our sustainability ambition is to work towards being Brisbane's most sustainable precinct by transitioning to a zero-carbon organisation. We aim to create, celebrate, educate and drive transformational change across the precinct, with restorative and regenerative outcomes.

Our sustainability ambitions, priorities and implementation actions are documented in:

- Sustainability Policy 2022
- Sustainability Strategy (being drafted)

The Green Team is established from passionate members from each Corporate team. It is empowered to make real change to create a more sustainable South Bank. Green Team members are encouraged to:

- Meet regularly (at least monthly)
- Be involved in discussions
- Generate ideas on new sustainability initiatives
- Inspire others to be more sustainable
- Participate in adhoc workshops and strategy sessions
- Assist with guiding strategies and implementing action plans
- Report back to their team on sustainability ideas and implementation

Reports to EMT and CEO with quarterly updates
